

The All-new shocking and more powerful appearance design to make it attractive.

The handle structure and the shape are simulated outdoor racing cycles, which will be more suitable for

the habit of many users and the changes of the riding posture; more humanized bottle holders and the

elbow cushion are more comfortable to ride.

The adjustment mode of the handle tube and seat tube adopt fast pressing mode, which is more

humanized.

The resistance adjustment knob is in large size and the color labels are more consistent with the

international safety rules.

The saddle is provided with bi-color coordination and a concave part is designed in the center position

which will offer comfort for male users.

The integrated combination of the crank with decorative cover and the front land pipe moving wheel

with protective cover makes bike more luxury.

The all-new appearance of the cycle sticker design is more dynamic performance and texture.

Other upgraded version with wireless console helps the users check the training results anytime: Scan /

Revolutions per minute of the pedals (RPM) / Speed / set target time / target distance / target calories.
