

1. Unique appearance design concept with independent innovation patent makes the product fashionable and beautiful .

2. Intelligent display:

A) 15.6'' screen with Android system.

B) LED dynamic digital display shows resistance level, motor rotating speed and running time at any moment.

These two choices can help you monitor the motion state.

3. The whole machine is made of a one-time forming mold, which makes the precision much higher.

4. Adopting reinforced cycle frame, which makes the product stronger, more stable and elegant.

5. Humanized design with user-defined programs.

6. Using the advanced electromagnetic resistance system and connecting external power supply make the machine more stable, safer and reliable.

7. Heart rate sensor bar helps to measure the hear rate of the user at any time.

8. Using balance weight footplate, which makes the user more comfortable and safer.

9. All the pivotal moving parts adopt reinforced accessories, which makes the movement more fluent and durable.

10. Sliding type seat makes it easy to get adjusted to meet different users. (for Recumbent Bike)

11. The new design is combination for both water holder and mobile holder.

12. Resistance: 20 levels

13. Max User Weight: 150KG

14. Max Motor Power: 300W

15. Max Motor Speed: 1000rpm

16. Language: English

17. Power type: External power supply

18. Comply with ISO 20957-1 ;2010 / ISO 20957-5;2010

Specifications

DIM. : (L)1195(W)620*(H)905mm*

Weight : N.W. : 80KG G.W. : 100KG
