

It adopts international advanced design concept, and it's famous for outstanding performance with

biomechanics and ergonomics, which also conforms to human anatomy and athletic physiology.

Square tube 50\*110mm and round tube  $\Phi$ 60mm get combination making the product stable and elegant.

The cushion adopts one-time forming technology making it comfortable and durable. The seat

adjustment is equipped with pneumatic system and aluminum alloy rail for sliding.

The cushion leather gets sewed with double stitches looking luxurious.

Full enclosed weight cover adopts absolute security design concept. where shown the beauty

appearance and real high-end quality.

The design follows foreign advanced design concept.

Use high tensile oval tube which gives enough thought of strength and fashion.

The strong magnetism pin have been used on machine, which can make the weight adjust easy and safety .

The high density nylon pulley, which is for industrial use.

The cable which covered by PU, the toughness and durability is great to use, can burden 1400KGF,  $\Phi$ 5.7mm.

Scientific movement track can take the proper training, sufficient considering of kinematics theory.

Effective in muscle training of pectorals/back and arms.

Specifications

DIM: (L)3836\*(W)870\*(H)2330mm

N. W. : 338KG

Weight stack:

Standard: 80KG

Max: 150KG

Muscles trained: different muscle groups
